Military Service: **To be Done**

APPLIED POSITION: Data/MLOps Engineer

Profile:

Sensible Data/MLOps Engineer with 8+ years of experience in design and implementing scalable data-driven solutions in a variety of industries. Skilled in Data Architecture Design principles, Data Modelling and ETL/ELT processes. Proficient in Python, SQL and Data Manipulation Tools. Keen understanding of Data Quality and Governance Practices, ensuring data flow is reliable, consistent, and secure.

WORK EXPERIENCE

Lead Data Engineer at Thousand Ways (Hezar Gozar), Tehran, Iran — sector: Telecommunication, IT

May 2020–Present (6 Years)

Started with ***Product Manager (PM)*** of a Chinese ***Big Data Analytics product*** called Sefonsoft SDC. afterwards, pivoted to ***Solution Architect (SA)*** of a domestic big data analytics and visualization platform called ***Zhaav***, Based on cloud-native principles, Accessible at https://zhaav.net/. Furthermore, created a team of data analytics for developing ***zhaav*** and answering telco-related ad-hoc data-driven requirements of Companies' customers.

Responsibilities

- Design and deploy performable data pipelines in various data centric projects.
- Dispatch and managing data related tasks through 5 members of my team as well as Mentoring new apprentices through on-boarding process.

Achievements

- Provision, Deploy and Functionality Acceptance Test (FAT) of the SDC project.
- Contributed in various projects in terms of data pipeline fine tuning, business domain pattern recognition, etc. due to the non-disclosure agreements with our national/governmental customers, related work portfolio can be provided upon request.
- Created a Real Time SQL Streaming Ecosystem with 50K EPS which accomplished bright results through a Customer Experience Management project in Telecommunication sector. Includes ingest, digest and storing data from various types and origins of data into Apache Doris Datawarehouse and providing data insights to telco engineers. Stream heavy lifting has been done using Risingwave streaming stack deployed on Kubernetes, alongside with Redpanda as structured streaming medium with protobuf.
- Developed an Smart Assistant System (RAG based offline LLM integration) called Zhaav-SAS.
- Implemented a CRD-based GPU virtualization service (vGPU) in Kubernetes environment on top of 6 Nvidia H200s, virtualizing the GPU resource requirements of user workloads dynamically.

Senior MLOps Engineer at Sheypoor, Tehran, Iran — sector: Ad-tech

Aug 2022-Mar 2023 (~half Year)

Joined as a member of ***data transformation process***, declared as a yearly target. Consists of transforming traditional data pipelines into newer approach, ***enhancing*** the algorithm of ***recommender system*** (Similar Listings) and applying ***Data Fabric Principles***.

Responsibilities

- Providing data pipelines in order to satisfy Customer's AdTech analytical needs.
- Migrating the traditional ETL pipelines from Hitachi PDI (Spoon) to Apache Airflow.

Achievements

- Re-implement the Content-based Filtering Recommender System of Real Estate ads vertical using several features of each listing, Elastic Search's vector search engine and tailor madding a vector similarity search algorithm on top of Facebook's FAIS library; with the TPS of ~400.
- Deployed MLOps pipeline (Polyaxon) as well as a series of workshops, explaining how to utilize it for data science experimenting, data sandbox and ML fine tuning.

Data Consultant at BRGroup CTO Department, Blue Ray Company, Tehran sector: Telecommunication

Jan 2022–June 2022

(~half Year)

Joined here due to OSS digitalization targets. There was a need for developing a solution which calculates the SLA (Service Level Agreement), between BRTell and MTNIrancell down to each action through whole MTNIrancell's network

Responsibilities

- Solution architect (SA) of SLA Calculation Solution.
- Implementing reporting data pipelines for performance team, using Ansible, python and Celery.

Achievements

- Developing an enterprise-level data pipeline for SLA Calculation through 7K+ lines of code.
- Developed an automated invocation procedure for NMOS query interface.

Data Analyst at Huawei Technologies, Tehran sector: Telecommunication

May 2018–May 2020

(2 Years)

Team member of ***Customer Experience Management (CEM) project***.
Participated through maintaining the big data lake of user-plane and signalling data, based on Apache Hadoop, Including ***Impala*** and ***Hbase***. create and maintain ***BI reports*** using ***Tableau*** and my ***Pandas*** Programming skills to verify the ***data accuracy*** of our big data infrastructure.

Responsibilities

- Determining business KPIs and the correlation factors, as well as defining novel business KQIs (Key Quality Indicator) in order to intensify quality of MTN Irancell's network and also refining the network's failures and weak points.
- Extracting data from mentioned data sources, doing the ETL/ELT process on them via tools like Tableau Prep, Python scripts and Airflow to make the customized correlation between raw data and business KPI/KQIs. Plus creating Stored Procedures and Triggers in order to ensure the availability of every aggregation level of data was part of my job.
- Developing python automation scripts in order to facilitate Telco Demarcation Processes.

Achievements

- I've held two series of Python training course for my Telecom colleagues, building up their automation skills, using Pandas and Numpy.
- Proficiency in Tableau, experienced several cases in which I turned a high-level business KPI into a complete data pipeline process and BI report.
- Huawei Employee of the month at August 2019

CONSULTANCIES

- 3-month consultancy in CEM Project of MCI (Hamrah e Avval) as a Data Engineer,
- Implementing data/MLOps engineering pipelines for two foreign startups: Tisitano and Neuroship.ai.

EDUCATION

MASTER OF ARTIFICIAL INTELLIGENCE

September 2019 - January 2021

at Islamic Azad University Science and Research Branch, Tehran, Iran

- Passing all the theory courses with ***GPA 2.7 through 3 semesters***.
- ***Quitting*** due to excessive work pressure and responsibilities in Huawei Technologies.

BACHELOR OF ENGINEERING IN COMPUTER ENGINEERING

September 2013 - January 2018

at Tabriz University, Tabriz, Iran

- Advanced Programming ***Teacher assistant*** (2 Semesters)
- Designed a Plant Care Robot called ***GolCare*** which utilized ***Q-Learning*** algorithm, seeking sufficient amount of light, humidity and temperature for proper plant growth.

PERSONAL SKILLS

Organisational and managerial skills	◆ Leadership (Responsible for manage and mentoring a team of 5 in the latest position) ◆ Team Player. happy to discuss technical challenges through the team
Communication skills	◆ Ethical Work Commitment ◆ Good Listener

Mother tongue	Farsi (Persian)				
Other language(s)	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken interaction	Spoken production	
English	Proficient	Proficient	Independent	Proficient	Proficient

TECHNICAL COMPETENCIFY

Programming Languages	◆ Python (PRO.) ◆ Bash Script (IN.) ◆ Rust (LE.)
Data Quality & Manipulation	◆ Pandas and NumPy (PRO.) ◆ Polars (PRO.) ◆ Great Expectations (PRO.)
ETL/ELT	◆ Apache Airflow (PRO.) ◆ Hitachi PDI (IN.)
Relational Databases	◆ Postgres (PRO.) ◆ MySQL (PRO.) ◆ Oracle (IN.)
Non-Relational Databases	◆ MongoDB (IN.) ◆ Redis (PRO.) ◆ MinIO (IN.)
Analytical Databases	◆ ClickHouse (PRO.) ◆ Apache Doris (PRO.)
Data Stream Stack	◆ RisingWave (PRO.) ◆ Kafka/ Redpanda (IN.) ◆ GlassFlow (PRO.)
Cloud Native Stack	◆ Docker (PRO.) ◆ Kubernetes (IN.)
LLM Stack	◆ Langchain (PRO.) ◆ N8N (IN.) ◆ LiteLLM (IN.)
Application Performance Monitoring	◆ Prometheus (PRO.) ◆ Grafana (PRO.) ◆ Logstash (IN.)
Visualization & BI	◆ Tableau (PRO.) ◆ Apache Superset (IN.)
Infrastructure	◆ VMware Stack's ESXi and VCenter (IN.) ◆ Ansible (IN.)
MLOPs	◆ MLFlow (IN.) ◆ Open metadata (LE.)
Operating System	◆ Debian based Linux (PRO.), LPIC-2 certified) ◆ MacOS (IN.)

(In.): Independent (Pro.): Proficient (Le.): Learning
